6. UPTIMIT noted that in 1962 heart attacks had taken a rather large: toll in CATIOE and as a result preventive measures were taken such as periodic physical examinations. As a result, there were only two such attacks in 1963.

- 7. I suggested that UTILITY inform I I about the release of personnel during 1963 and he repeated the figure of approximately 80 noting as usual that not all were released because of security reasons.
- 8. I also suggested that UTILITY comment on the problem of adopting an invitative program which he has previously called a very hot issue. UTILITY marely said that they are using the invitation on their top people. I whatevered UTILITY's problem and said that he is often saked "on the Hill" whether it does not intringe upon civil liberties. I I said he agrees that it does but that in his position he had to give up some of his civil liberties, so does a policeman and therefore so should others if they want to work in KURARS. I would utility that efforts were underway to get the invitation adopted community-wide and he referred to the unfortunate case of figt. Dumlop.
- 9. In was pushed for time at this point. He told DYNLTY how glad he was to talk to him; he expressed regret that the visit was such that he could not give UTILITY more time and he hoped the next time he could.
